Personal Site Guide

1   Personal Site Guide

1.1   Overview

Kentico CMS **Personal Site** allows you to easily run your own personal web site. It comes with several design templates and you can easily change the graphics.

The Personal Site is built with Kentico CMS and it comes with following features out-of-the box:
- **Content editing**
- **Blogs**
- **Forums**
- **Photo Galleries**

You can also use other Kentico CMS modules (such as newsletter, polls or forms) as you need.

To learn about other features and capabilities of Kentico CMS, please refer to other Kentico documentation, such as **Kentico CMS Tutorial** (http://www.kentico.com/devnet/documentation.aspx).

You can contact our technical support at http://www.kentico.com/Support.aspx.
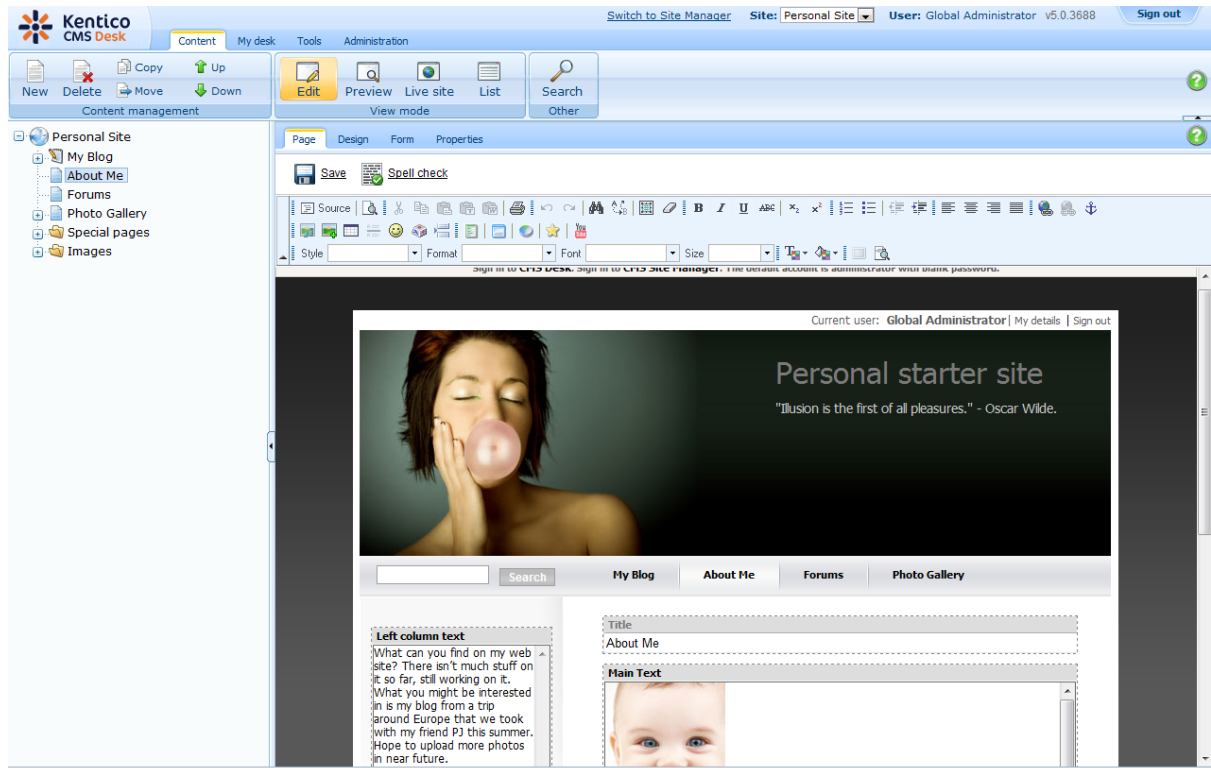

Part

II

Getting Started
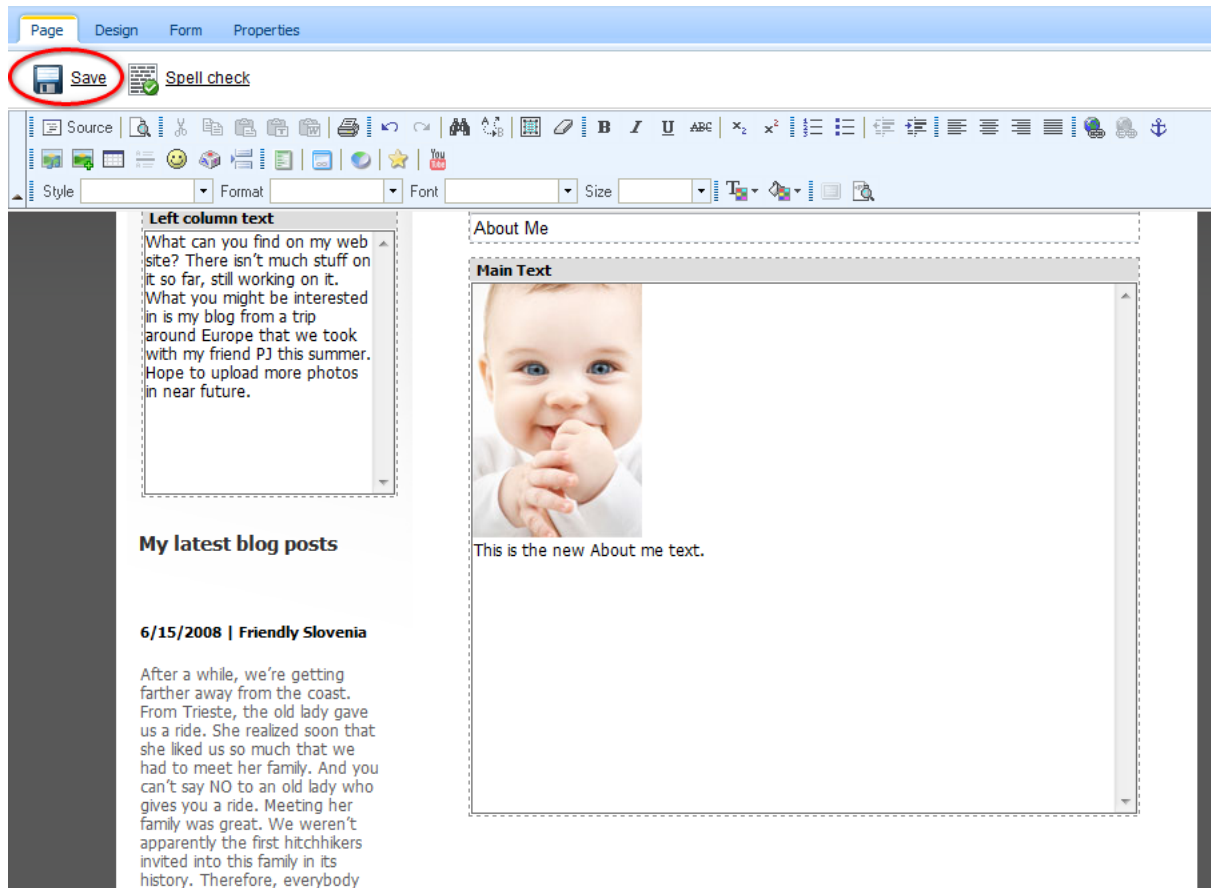

2   Getting Started

2.1   Editing content

In this chapter, you will learn how to change the **About** text on your web site.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **About me**.

2. Make sure you are on the **Page** tab and click into the **Main text** text box. Erase the text from the text box and enter *This is the new About me text.* Then click **Save** at the top-left.
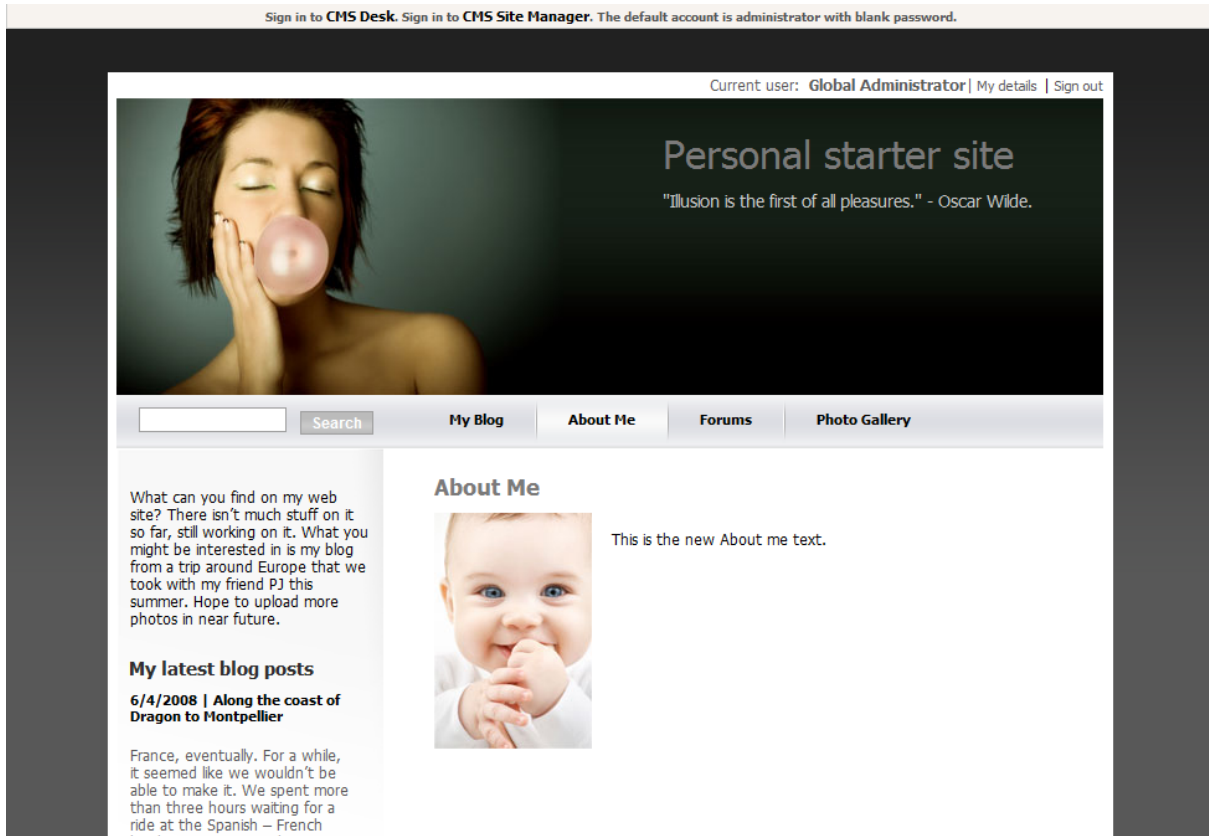

3. Now switch to the **Preview** viewing mode. You can see that the **About me** text has been updated.

## 2.2 Adding a blog post

In this chapter, you will learn how to add a new post to your blog.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **My Blog** and click **New** in the document action toolbar.

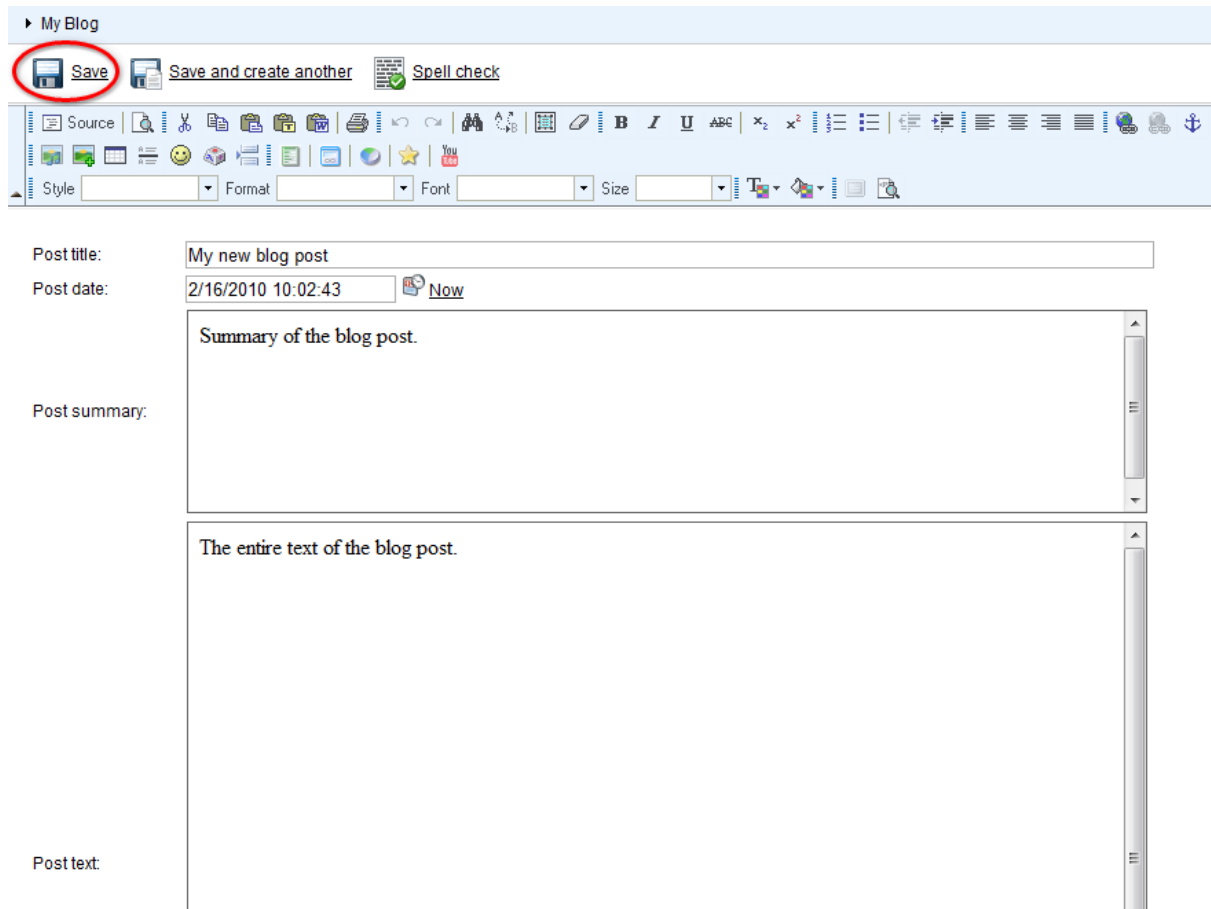

2. Choose **Blog post** as a new document type.

3. Next, enter information for your new blog post.

- **Post title:** My new blog post
- **Post Summary:** Summary of the blog post.
- **Post text:** The entire text of the blog post.

Then click **Save** at the top.

Your new blog post has been added to **My Blog**.

2.3   Adding a photo gallery

In this chapter, you will learn how to add the new photo gallery and upload some photos.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **Photo Gallery** and click **New** in the document action toolbar.

2. Choose **Image gallery** as a new document type.

New document

Please select new document type:

- Page (menu item)

- Article
- Blog
- Cell phone
- Event
- Event (booking system)
- FAQ
- File
- Folder
- Image gallery
- Job opening
- Knowledge base article
- Laptop
- News
- Office
- PDA
- Press release
- Product
- Simple article

- Link an existing document
3. Enter *New gallery* into the **Name** text box and click **Browse ...** . Choose some **Teaser image**. Then click **Save** at the top.

▸ Photo Gallery

💾 Save 💾 Save and create another 📋 Spell check

Name: New gallery

Description:

Teaser image:

Personal Site - Photo Gallery   [Select]

📝 Save as new template...

📝 Inherit template

📝 Clone template as ad-hoc

📝 Edit template properties

Inherit content
◉ Use page template settings
○ Do not inherit any content
○ Select inherited levels

5. Your new gallery is ready. All you have to do is to add some pictures into your new created gallery. Make sure **New gallery** is selected in the content tree and click **New** in the document action toolbar. Choose **File** as the new document type.

6. Click the **Upload file** ( ) icon and choose a picture to upload.
Then enter *The description of the first picture.* into the **File description** text box and click **Save** at the top.

Congratulations, you've just learned how to create a new gallery and add some pictures into it.

Please note that you can take advantage of the **File Import** module to upload more images and files. The **File Import** module can be found at **CMS Desk** -> **Tools** -> **File import**.

2.4 Adding a forum

In this chapter you will learn how to create a new forum, create new thread and post a message.

1. Go to **CMS Desk** -> **Tools** -> **Forums** and click **Edit** next to the **My Forums** group.
2. In the **Forum group properties**, click **Add forum** .

3. Add the following information for the new forum:

- **Forum display name:** New forum
- **Forum code name:** newForum
- **Description:** The description of the new forum.

Then click **OK**.

4. The forum has been added as you can see in the following screenshot.

III
Adjusting Design

3   Adjusting Design

3.1   Changing the theme

The sample Personal Site comes with several predefined CSS stylesheets. In this chapter, you will learn which stylesheets are available and how you can choose the CSS stylesheet you want to use on your web site.
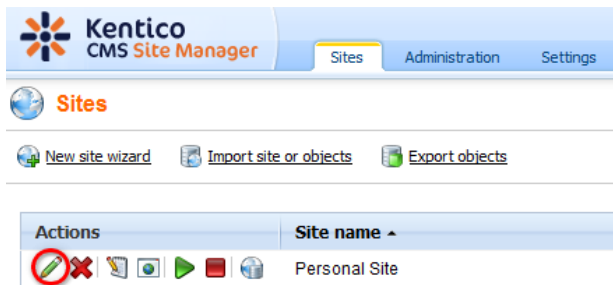

To choose the CSS stylesheet for your website, go to **CMS Site Manager** -> **Sites** and click **Edit site** next to the **Personal Site**.

In the **Site Properties**, choose your CSS stylesheet from the **Site CSS stylesheet** drop-down list.
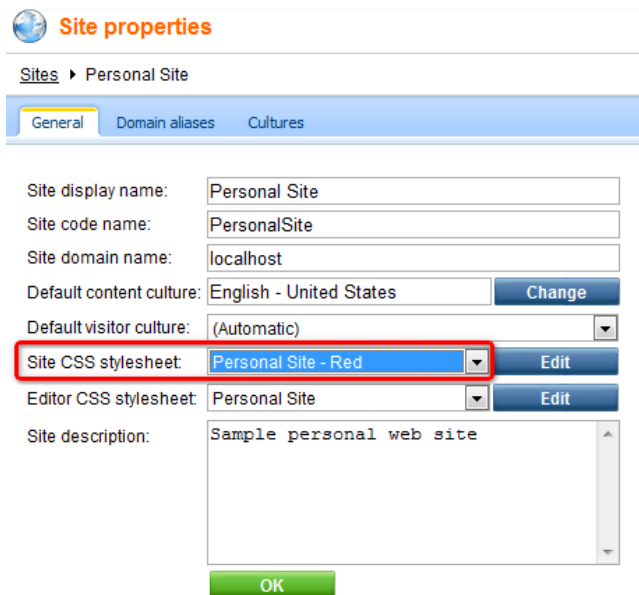

The following CSS stylesheets are available in the sample **Personal Site**:

Personal Site

Personal Site - Blue

Personal Site - Green

Personal Site - Red

3.2   Editing CSS stylesheets

In this chapter, you will learn how to change the design of your web site by modifying the CSS stylesheets.

Changing the header picture

1. Go to **CMS Site Manager** -> **Development** -> **CSS stylesheets**, click **Edit** next to **Personal Site** and choose **Main styles -> Master page** section in the text box on the left side.
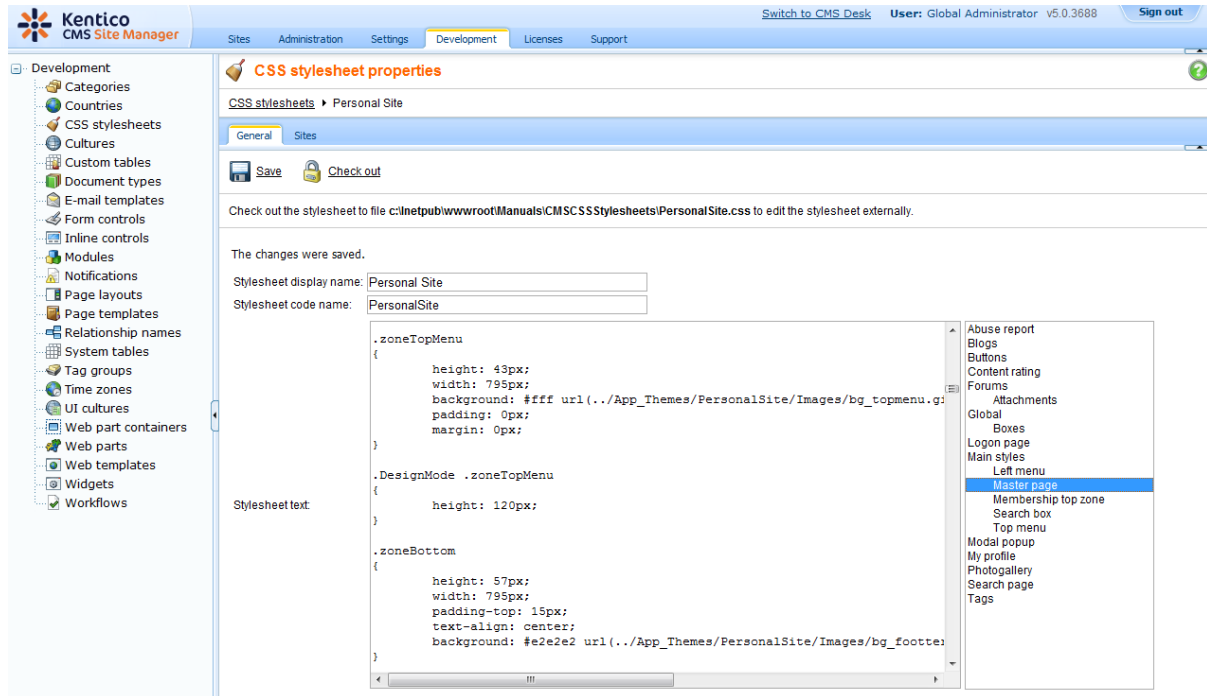

2. In the **.zoneTop** style, change the url of the background image to **../App_Themes/ PersonalSiteGreen/Images/bg_head.jpg** so that the entire style reads as follows:

```
    .zoneTop
{
    height: 239px;
    width: 795px;
    background-color: #fff;
    padding: 0px 0px 7px;
    margin: 0px 0px 0px;
    background: #fff url(../App_Themes/PersonalSiteGreen/Images/bg_head.jpg)
     no-repeat top left;
}
```

Then click **Save** at the top-left.

3. Now click **Sign out** at the top-right. You can see that the header image has been changed.
Changing the top menu

1. Go to **CMS Site Manager** -> **Development** -> **CSS stylesheets** and choose **Main styles/Master page** section in the text box on the left side.

2. Scroll down to see **.zoneTopMenu** style.

3. Change the **background** color to *#B0C4DE* and erase the URL part so that the entire section reads as follows:

```
    .zoneTopMenu
{

     height: 43px;
     width: 795px;
     background: #B0C4DE;
     padding: 0px;
     margin: 0px;
}
```

This will change the background of the navigation at the top to dark blue.

4. Now, switch to the **Top menu** section and find **.CMSListMenuLI a:hover** style. This style modifies the appearance of menu item when mouse is over it.

5. Change **color** to *#fff* and replace the url part with *#87CEFA*. The entire style should read as follows:

```
.CMSListMenuLI a:hover, .CMSListMenuLinkHighlighted, .CMSListMenuLIlast a:hover,
.CMSListMenuHighlightedLIlast a, .CMSListMenuHighlightedLI a
{
            color: #fff;
            background: #87CEFA;
            text-decoration: none;
}
```

This will change the background of the menu item to light blue and its font color to white when mouse hovers above it.

You've just learnt how modify CSS stylesheets to change design of your web site.
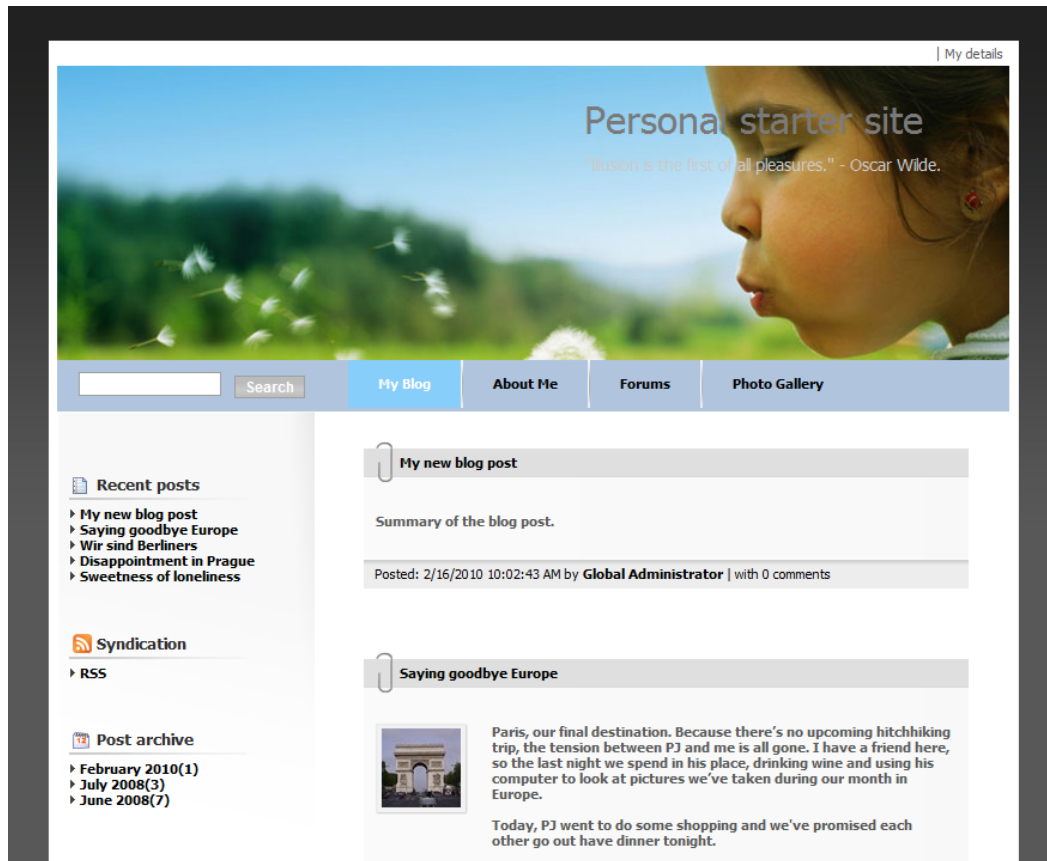

Part IV

Adding web parts

4 Adding web parts

4.1 Adding text

In this chapter, you will learn how to add the new editable text region into your web site.

1. Go to **CMS Desk** -> **Content** -> **About Me** and switch to the **Design** tab. Click **Add web part** in **zoneRight**.
2. Select **Text/EditableText** web part.
3. In the **Web part properties** dialog, enter the following information for the new web part.

- **Editable region title:** AboutWebPageTitle
- **Content before:** <h1>
- **Content after:** </h1>

Then click **Ok**.

4. Click **Add web part** again and select the same **Text/EditableText** web part.

5. In the **Web part properties** dialog, enter *AboutWebPageText* into the **Editable region title** textbox. Then click **Ok**.

6. Now you have the new web parts ready and you can enter some new text. Switch to the **Page** tab and click into the **AboutWebPageTitle** editable region. Enter *About my web page*. Click **Save** at the top.

7. Click into the **AboutWebPage** editable region and enter *This is a short text about my web page.* Click **Save** again.
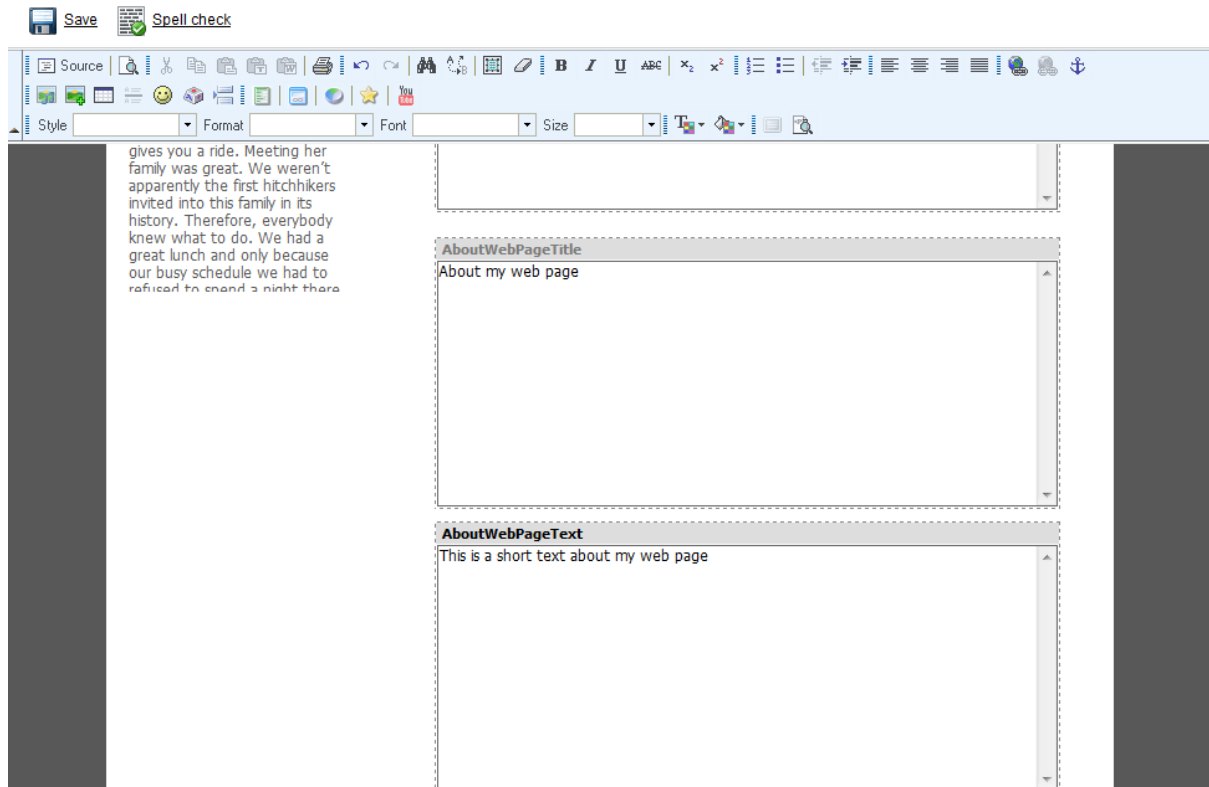

That is how you add a new editable region into your web site.
4.2   Adding a poll

In this chapter, you will learn how to create a new poll and add it to your web page.

1. First of all we need to create a new poll. Go to **CMS Desk** -> **Tools** -> **Polls** and click **New poll**.

2. Enter the following information for the new poll.

- **Display name:** My poll
- **Code name:** MyPoll
- **Question:** How do you like my pictures?
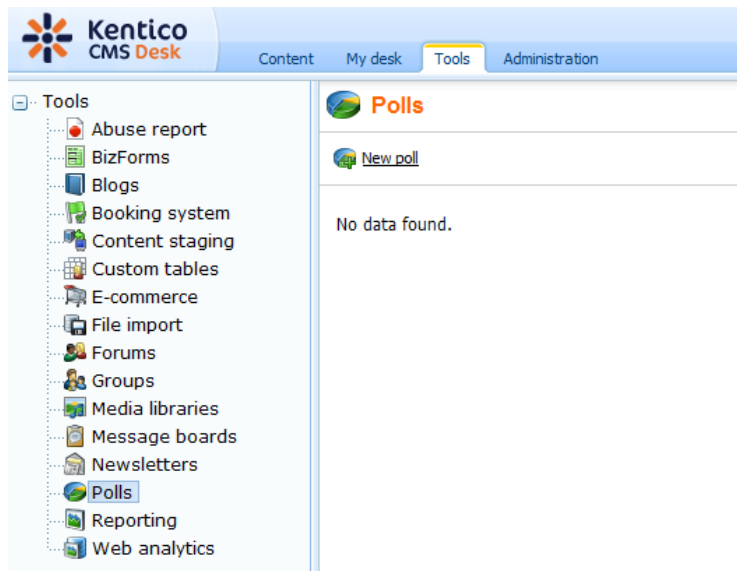

Then click **Ok**.

3. Now we need to defined some questions for your new poll. In the poll properties, switch to **Answers** tab and click **New answer** . Into the **Text** text box, enter *I love them!* and click **Ok**.

4. Click **New answer** again and enter *Not bad.* as **Text**. The **Enabled** check box should be checked. Then click **Ok**.
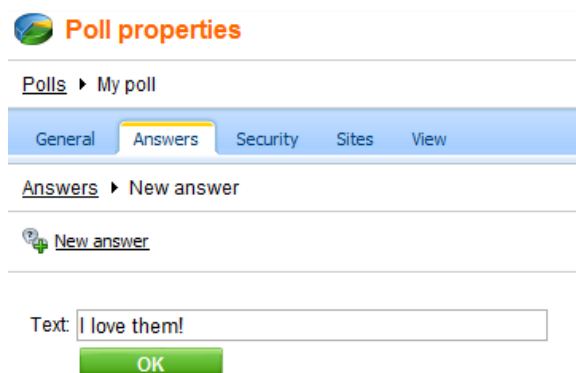

5. Click **New answer** again and enter *Waste of time!* into the text box provided. Click **Ok**.

6. Now we are ready to add your new poll to web site. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **Photo Gallery** and switch to the **Design** tab. Click **Add web part** in **zoneLeft**.

7. In the **Select web part** dialog, select **Polls\Poll** web part.

8. In the **Web part properties** dialog, make sure **My poll** is selected as **Poll name** and click **Ok**.

Congratulations, you've just learned how to add a new poll to your web site.
