Hands on Lab: Integrating Twitter with Kentico CMS

Lab Overview

System Requirements:

- Kentico CMS 7 installed with the Sample Corporate Site
- Active Twitter account

Intended Lab Audience:

- Content Administrators
- CMS Designers

Lab Introduction

Technically, Twitter is a micro blogging platform that limits real time comments (tweets) to 140 characters. What may seem like a simple technology has become a worldwide phenomenon with a projected 200 million active users. Leveraging this platform many companies are looking to Twitter as a key part of their integrated marketing campaigns and a key source of real time customer connections. With an extensive and well documented API, Twitter looks to make site integration as easy as possible. In this lab, we will add Twitter functionality to the Kentico Corporate sample site. This will enable site users to tweet and engage about the things they find on your site and enable site owners and administrators to extend their reach. In completing this set of labs you will perform the following tasks:

• Add the Twitter feed web part

- Add the Twitter follow button web part
- Add the Twitter tweet button web part
- Update the Home page template

Lab 1: Twitter feed web part

1. Log into CMS Desk as Administrator, in the Content tree select the Home page, and then select the Design tab as shown in the following screenshot.

2. In the web part toolbar with All web parts selected enter Twitter, then click the Search (magnify) button as shown in the following screenshot.

All web parts 💌 🎲	^
Twitter	
Twitter feed	1
Twitter follow button	
Divitter tweet button	
	E

3. From the Web part toolbar drag the **Twitter feed** web part into the **Main zone** web part zone as shown in the following screenshot.

 Actions zone 		
▼ Widget actions		
▼ Mobile redirection 🎯		
🔻 💟 Left zone 🛛 🖶	 Main zone 	4
▼ ∑ CorporateSite_RandomProducts	Twitter feed	
	veicome to the samp	le Corporate Site

4. In the **Web part properties (Twitter feed)** update the following fields and then select **Ok**.

Tab	Field	Value
General	User name	Your company twitter name
General	Number of tweets	3
General	Poll for new results	Checked

5. In the Design tab validate that you see the **TwitterFeed** web part as shown in the following screenshot.

Lab 2: Twitter follow button web part

1. Log into CMS Desk as Administrator, in the Content tree select the Home page, and then select the Design tab as shown in the following screenshot.

2. In the web part toolbar with All web parts selected enter Twitter, then click the Search (magnify) button as shown in the following screenshot.

3. From the Web part toolbar drag the Twitter follow button web part into the Main zone web part zone as shown in the following screenshot.

Summary

In this set of Hands on Labs we have looked at how we can add Twitter support using both a Static text web part and page template. Specifically we covered the following.

- Add the Twitter feed web part
- Add the Twitter follow button web part
- Add the Twitter tweet button web part
- Update the Home page template
