Personal Site Guide

1 Personal Site Guide

1.1 Overview

Kentico CMS **Personal Site** allows you to easily run your own personal website. It comes with several design templates and you can easily change the graphics.

The Personal Site is built with Kentico CMS and it comes with following features out-of-the box:

- **Content editing**
- **Blogs**
- **Forums**
- **Photo Galleries**

You can also use other Kentico CMS modules (such as newsletter, polls or forms) as you need.

To learn about other features and capabilities of Kentico CMS, please refer to other Kentico documentation, such as **Kentico CMS Tutorial** (<http://www.kentico.com/devnet/documentation.aspx>).

You can contact our technical support at <http://www.kentico.com/Support.aspx>.

Part

Getting Started

2 Getting Started

2.1 Editing content

In this chapter, you will learn how to change the **About** text on your website.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **About me**.

2. Make sure you are on the **Page** tab and click into the **Main text** text box. Erase the text from the text box and enter *This is the new About me text*. Then click **Save** at the top-left.

3. Now switch to the **Preview** viewing mode. You can see that the **About me** text has been updated.

2.2 Adding a blog post

In this chapter, you will learn how to add a new post to your blog.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **My Blog** and click **New** in the document action toolbar.

2. Choose **Blog post** as a new document type.

3. Next, enter information for your new blog post.

- **Post title:** My new blog post
- **Post Summary:** Summary of the blog post.
- **Post text:** The entire text of the blog post.

Then click **Save** at the top.

My Blog

 Save  Save and create another  Spell check

Source |          **B** *I* U ABC x₂ x²             

2.3 Adding a photo gallery

In this chapter, you will learn how to add the new photo gallery and upload some photos.

1. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **Photo Gallery** and click **New** in the document action toolbar.
2. Choose **Image gallery** as a new document type.

 **New document**

Please select new document type:

-  [Page \(menu item\)](#)
-  [Article](#)
-  [Blog](#)
-  [Cell phone](#)
-  [Event](#)
-  [Event \(booking system\)](#)
-  [FAQ](#)
-  [File](#)
-  [Folder](#)
-  [Image gallery](#)
-  [Job opening](#)
-  [Knowledge base article](#)
-  [Laptop](#)
-  [News](#)
-  [Office](#)
-  [PDA](#)
-  [Press release](#)
-  [Product](#)
-  [Simple article](#)

 [Link an existing document](#)

3. Enter *New gallery* into the **Name** text box and click **Browse ...** . Choose some **Teaser image**. Then click **Save** at the top.

The description of the first picture

Congratulations, you've just learned how to create a new gallery and add some pictures into it.

Please note that you can take advantage of the **File Import** module to upload more images and files. The **File Import** module can be found at **CMS Desk -> Tools -> File import**.

2.4 Adding a forum

In this chapter you will learn how to create a new forum, create new thread and post a message.

1. Go to **CMS Desk -> Tools -> Forums** and click **Edit** next to the **My Forums** group.

2. In the **Forum group properties**, click **Add forum** (.

3. Add the following information for the new forum:

- **Forum display name:** New forum
- **Forum code name:** newForum
- **Description:** The description of the new forum.

Then click **OK**.

 **Forum group properties**

Adjusting Design

3 Adjusting Design

3.1 Changing the theme

The sample Personal Site comes with several predefined CSS stylesheets. In this chapter, you will learn which stylesheets are available and how you can choose the CSS stylesheet you want to use on your website.

To choose the CSS stylesheet for your website, go to **CMS Site Manager** -> **Sites** and click **Edit site** next to the **Personal Site**.

In the **Site Properties**, choose your CSS stylesheet from the **Site CSS stylesheet** drop-down list.

The following CSS stylesheets are available in the sample **Personal Site**:

My new blog post

Summary of the blog post.

Posted: 2/16/2010 10:02:43 AM by [Global Administrator](#) | with 0 comments

Saying goodbye Europe

Paris, our final destination. Because there's no upcoming hitchhiking trip, the tension between PJ and me is all gone. I have a friend here, so the last night we spend in his place, drinking wine and using his computer to look at pictures we've taken during our month in Europe.

Today, PJ went to do some shopping and we've promised each other go out have dinner tonight.

Personal Site - Red

3.2 Editing CSS stylesheets

In this chapter, you will learn how to change the design of your website by modifying the CSS stylesheets.

Changing the header picture

1. Go to **CMS Site Manager -> Development -> CSS stylesheets**, click **Edit** next to **Personal Site** and choose **Main styles -> Master page** section in the text box on the left side.

2. In the `.zoneTop` style, change the url of the background image to `../App_Themes/PersonalSiteGreen/Images/bg_head.jpg` so that the entire style reads as follows:

```
.zoneTop
{
    height: 239px;
    width: 795px;
    background-color: #fff;
    padding: 0px 0px 7px;
    margin: 0px 0px 0px;
    background: #fff url(../App_Themes/PersonalSiteGreen/Images/bg_head.jpg)
    no-repeat top left;
}
```

Then click **Save** at the top-left.

3. Now click **Sign out** at the top-right. You can see that the header image has been changed.

Changing the top menu

1. Go to **CMS Site Manager** -> **Development** -> **CSS stylesheets** and choose **Main styles/Master page** section in the text box on the left side.
2. Scroll down to see **.zoneTopMenu** style.

The screenshot shows the 'CSS stylesheet properties' window in Kentico CMS. The 'Stylesheet text' field contains the following CSS code:

```

/*#Main styles/Master page#*/
.mainDiv
{
    width: 796px;
    margin: 35px auto;
    padding: 0px 7px 0px 7px;
    background-color: #fff;
}

.zoneTop
{
    height: 239px;
    width: 795px;
    background-color: #fff;
    background: #fff url(../App_Themes/PersonalSite/Images/bg_head.jpg)
}

.zoneTopMembership
{
    width: 795px;
    height: 15px;
    padding: 3px 0 3px 0;
}

```

3. Change the **background** color to **#B0C4DE** and erase the URL part so that the entire section reads as follows:

```

.zoneTopMenu
{
    height: 43px;
    width: 795px;
    background: #B0C4DE;
    padding: 0px;
    margin: 0px;
}

```

This will change the background of the navigation at the top to dark blue.

4. Now, switch to the **Top menu** section and find **.CMSListMenuLI a:hover** style. This style modifies the appearance of menu item when mouse is over it.

 **CSS stylesheet properties**

CSS stylesheets ▶ Personal Site

General Sites

 Save  Check out

Check out the stylesheet to file `c:\inetpub\wwwroot\Manuals\CMS\SSStylesheets\PersonalSite.css` to edit the stylesheet externally.

Stylesheet display name:

Stylesheet code name:

Stylesheet text:

```
.CMSListMenuLI a:hover, .CMSListMenuLinkHighlighted, .CMSListMenuLIlast a:h
{
    color: #000;
    background: url(../App_Themes/PersonalSite/Images/bg_topmenu_hover.c
    text-decoration: none;
}

.UnigridActionButton
{
    margin-right: 5px;
}

.RTL .UnigridActionButton
{
    margin-right: auto;
    margin-left: 5px;
}

/*#Main styles/Left menu#*/
.leftMenu .CMSListMenuLI, .leftMenu .CMSListMenuHighlightedLI
{
    background: none;
    line-height: 18px;
}
```

- Abuse report
- Blogs
- Buttons
- Content rating
- Forums
 - Attachments
- Global
 - Boxes
- Logon page
- Main styles
 - Left menu
 - Master page
 - Membership top zone
 - Search box
 - Top menu**
- Modal popup
- My profile
- Photogallery
- Search page
- Tags

5. Change **color** to `#fff` and replace the url part with `#87CEFA`. The entire style should read as follows:

```
.CMSListMenuLI a:hover, .CMSListMenuLinkHighlighted, .CMSListMenuLIlast a:hover,
.CMSListMenuHighlightedLIlast a, .CMSListMenuHighlightedLI a
{
    color: #fff;
    background: #87CEFA;
    text-decoration: none;
}
```

This will change the background of the menu item to light blue and its font color to white when mouse hovers above it.

You've just learnt how modify CSS stylesheets to change design of your website.

The screenshot shows a web page layout for a personal blog. At the top right, there is a link for "My details". The main header features a large background image of a young girl blowing a dandelion seed. Overlaid on this image is the text "Personal starter site" and a quote: "Illusion is the first of all pleasures." - Oscar Wilde.

Below the header is a navigation bar with a search input field and buttons for "Search", "My Blog", "About Me", "Forums", and "Photo Gallery".

The left sidebar contains three sections:

- Recent posts**:
 - ▶ My new blog post
 - ▶ Saying goodbye Europe
 - ▶ Wir sind Berliner
 - ▶ Disappointment in Prague
 - ▶ Sweetness of loneliness
- Syndication**:
 - ▶ RSS
- Post archive**:
 - ▶ February 2010(1)
 - ▶ July 2008(3)
 - ▶ June 2008(7)

The main content area displays two blog posts:

- My new blog post**:
 - Summary of the blog post.
 - Posted: 2/16/2010 10:02:43 AM by **Global Administrator** | with 0 comments
- Saying goodbye Europe**:
 -  Paris, our final destination. Because there's no upcoming hitchhiking trip, the tension between PJ and me is all gone. I have a friend here, so the last night we spend in his place, drinking wine and using his computer to look at pictures we've taken during our month in Europe.
 - Today, PJ went to do some shopping and we've promised each other go out have dinner tonight.

Part

Adding web parts

4 Adding web parts

4.1 Adding text

In this chapter, you will learn how to add the new editable text region into your website.

1. Go to **CMS Desk** -> **Content** -> **About Me** and switch to the **Design** tab. Click **Add web part** in **zoneRight**.

2. Select **Text/EditableText** web part.

3. In the **Web part properties** dialog, enter the following information for the new web part.

- **Editable region title:** AboutWebPageTitle
- **Content before:** <h1>
- **Content after:** </h1>

Then click **OK**.

4. Click **Add web part** again and select the same **Text/EditableText** web part.

5. In the **Web part properties** dialog, enter *AboutWebPageText* into the **Editable region title** textbox. Then click **OK**.

6. Now you have the new web parts ready and you can enter some new text. Switch to the **Page** tab and click into the **AboutWebPageTitle** editable region. Enter *About my web page*. Click **Save** at the top.

7. Click into the **AboutWebPage** editable region and enter *This is a short text about my web page*. Click **Save** again.

That is how you add a new editable region into your website.

4.2 Adding a poll

In this chapter, you will learn how to create a new poll and add it to your web page.

1. First of all we need to create a new poll. Go to **CMS Desk** -> **Tools** -> **Polls** and click **New poll** (🌐).

2. Enter the following information for the new poll.

- **Display name:** My poll
- **Code name:** MyPoll
- **Question:** How do you like my pictures?

Then click **OK**.

3. Now we need to defined some questions for your new poll. In the poll properties, switch to **Answers** tab and click **New answer** (📄). Into the **Text** text box, enter *I love them!* and click **OK**.

The screenshot shows the 'Poll properties' dialog box with the 'Answers' tab selected. The breadcrumb path is 'Polls > My poll'. The 'Answers' tab is active, showing a 'New answer' button with a document icon. Below this, there is a 'Text' input field containing the text 'I love them!' and a green 'OK' button.

4. Click **New answer** again and enter *Not bad.* as **Text**. The **Enabled** check box should be checked. Then click **OK**.

5. Click **New answer** again and enter *Waste of time!* into the text box provided. Click **OK**.

6. Now we are ready to add your new poll to website. Go to **CMS Desk** -> **Content** -> **Personal Site** -> **Photo Gallery** and switch to the **Design** tab. Click **Add web part** in **zoneLeft**.

7. In the **Select web part** dialog, select **Polls\Poll** web part.

8. In the **Web part properties** dialog, make sure **My poll** is selected as **Poll name** and click **OK**.

Congratulations, you've just learned how to add a new poll to your website.

[My Blog](#) [About Me](#) [Forums](#) [Photo Gallery](#)

About my photos

Alright, let's be clear on this.

I'm far from being a professional photographer. Therefore, if you're looking for mesmerizing pictures, I advise you to search somewhere else.

How do you like my pictures?

I love them!

Not bad.

Waste of time!

List of galleries

In these galleries, you can find pictures I took in past few months. I'm planning to upload more pictures in near future.

European Trip

Set of pictures, we've taken on our hitchhiking trip around Europe with my friend PJ. Additional pictures are to come.

Sweet Home Arizona

Nothing compares to smell of desert after moonson rain.
Nothing compares to sound of coyote howling at the Moon.
Nothing compares to view of blossoming saguaro.
Nothing compares to Arizona.
