<u>Please note</u>: In Kentico CMS user's guide, we demonstrate the capabilities of Kentico CMS on the example of the sample Corporate Site. Your particular website application may vary.

# **1** Introduction

#### **1.1 Kentico CMS overview**

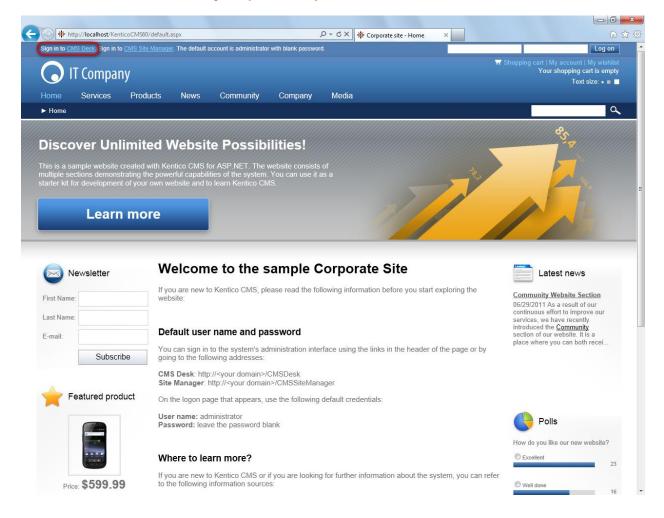

Kentico CMS for ASP.NET is a piece of software that allows a person without any programming knowledge to create a powerful dynamic website.

By using Kentico CMS, you will be able to manage and edit the content of your website in a quick, efficient and professional manner.

5

### 1.2 Signing in

- 1. Open your favorite web browser and go to your website.
- At the very top of your website, click Sign in to CMS Desk. This link is only available on the sample Corporate Site. On your own website, you will need to go to http://<your website>/cmsdesk – e.g.: http://www.mydomain.com/cmsdesk.

3. In the following interface, type in your user name and password and click Log on.

	Kenti	00000	65	sik
		Please log on		lit
	User name: Password:	administrator		
~	Passworu.	Remember me		
nit	? 🔑 🕚		Log on	
un			lities	

Congratulations, you've just log on to the CMS Desk for the first time.

7

### 1.3 User interface overview

The user interface of Kentico CMS consists of several sections. You will see that each of these sections has its specific functionality and its logical relation to the others. As a whole, the sections form a graphical interface that is easy to use and quick to navigate through.

Main menu	View mode selection	Editing mode selection	Go to Live Site	Switch to Site Manager	Site selection	Current user	Current version

If you sted services to be purcha	y clicking the links in the have a section like this of	e left
				*****			Annual and a second second

The main sections are:

- Main menu where you can switch between the Content, My Desk, Tools, Administration, Ecommerce and On-line marketing sections. You will be using only the Content tab most of the time.
- Document actions toolbar where you can create, delete, edit, copy, move or sort documents.
- View mode selection that allows you to choose between editing, preview, live view and list view depending on whether you want to edit content of your website or just see how it looks in a browser.
- **Content tree** that displays the structure of your website and allows you to organize documents/pages in it.
- Page editing mode where you can choose the way you want to edit the content of the page. You
  can choose from editing of the content of your page, editing document fields, product or
  document properties and viewing page analytics. If you're an administrator, you can also design
  the page template.
- Editing/viewing space where the page chosen in the content tree is displayed in the mode that has been selected in the view and page editing toolbar.

# 2 Managing my profile

### 2.1 Changing my e-mail and preferred language

Now you will learn how to change your e-mail and preferred language.

1. In the main menu, switch to the **My Desk** tab, choose **Account** in the ribbon menu and navigate to the **Details** tab.

Kentico CMS Desk ca	ontent My desk Tools Administration E-co	mmerce On-line marketing	<u>Live Site</u> <u>Site Manager</u>	Corporate Site 💌	👤 Global Administrator 👻 🕫	i.0.4246 🥩 Sign Out Enterprise Marketing Solution

Avatar:	A .					
	Upload: Browse.					-

2. Place the cursor into the **E-mail** text box and type in your e-mail address. Then click the **Preferred content culture** drop-down list and choose the preferred culture.

That's how you change your e-mail address and your preferred language.

### 2.2 Changing my password

Now you will learn how to change your password for logging in to the CMS Desk.

1. In the main menu, switch to the **My Desk** tab, select to **Account** in the ribbon menu and choose the **Change password** tab.

Kent	ico		_						Live Sit	<u>e Site M</u>	lanager	Corporate Site 💌	👤 Global Administrator 🔻	v6.0.4246	3	Sign Out

	Set password

That's how you change your password for the access to the CMS Desk.

# 3 Getting started

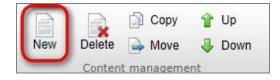

#### 3.1 Creating a new web page

Let's start from the beginning, therefore, with creating a new webpage.

1. Firstly you have to choose in the **Content tree** where you want your new page to be located in the structure of your website.

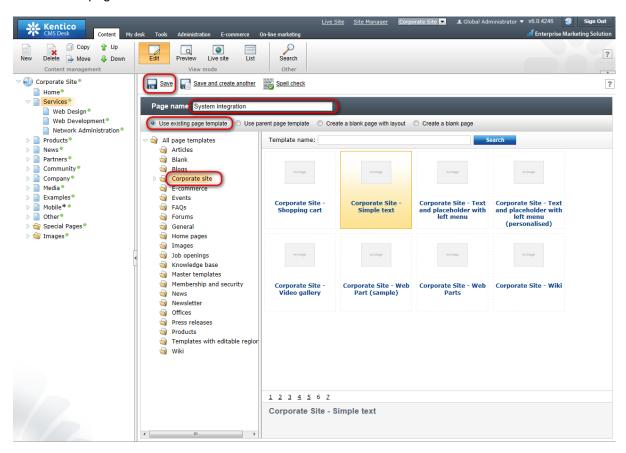

2. Click on the existing document. The new page will be appended to the document you've just clicked on. Click the **New** button in the document action toolbar.

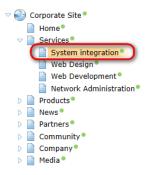

On the right side in the editing/viewing space, you should see the types of documents you are allowed to create in the chosen location.

New document							
Please select new document type:							
Document type name : LIKE  Show							
Page (menu item)							
Article							
灯 <u>Bloa</u>							
<u>Cell phone</u>							
E-book							
P Event							
👺 Event (booking system)							
2 FAQ							
File							
lange State							
Image gallery							
3 Job opening							
<u>Knowledge base article</u>							
aptop							
<u>News</u>							
Notice							
I PDA							
Ress release							
Sproduct							
Product - Cell phone							
Jeroduct - Laptop							
Simple article							

Click the Page (menu item) option. In the following step, please enter the name of your new web
page: System integration. Choose to Use an existing page template and select the Corporate
site/Corporate Site - Simple text template. If you're an administrator, you can also choose to create
a blank page and create it from scratch. Click Save.

Now you can see your **System integration** page added to the content tree under the already existing page.

Congratulations, you've just created your first web page. In the next chapter, we will add some content to it.

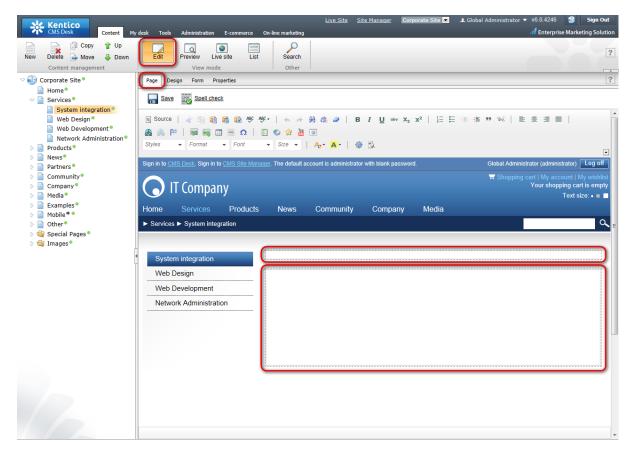

13

### 3.2 Editing page content

Now we will edit the content of the newly created page.

Click on the **System integration** page in the content tree on the left side. On the right side in the **Editing/viewing space**, you can see its content. As we have used the template with two editable regions – header text and content text, we are now able to enter some information into these regions.

Please make sure that the **Page** tab in the page editing mode toolbar is selected. Only then, you will be able to edit content in the editable regions of your page.

1. Place the cursor into the first text box and type in System integration.

2. Then enter *We provide system integration services* in the **Editable region** box.

	IT Compar		Nerrow		<u></u>	Martin	Text size: ∎
ome	Services	Products	News	Community	Company	Media	
Service	s 🕨 System integ	ration					
Svste	em integration		System integr	ation			
	_		,				
vveb	Design		We provide	system integration	services		
Web	Development		ino provido :	system integration	00111000.		
Netw	ork Administrati	on					
	one, tarihibituti						
			1				

3. Click the **Save** at the top-left and switch to the **Live site** mode in the page editing mode toolbar. You should see the System integration page with updated content.

You've just entered your first content to your web page.

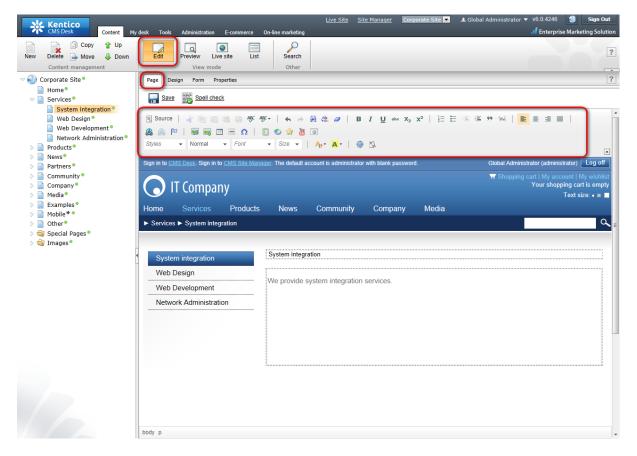

15

# 4 Using the editor

#### 4.1 Using What You See Is What You Get editor

In Kentico CMS, you can use the WYSIWYG (What You See Is What You Get) editor to create web content without HTML knowledge. Its functions are similar to Microsoft Word.

Open your **System integration** page and choose the **Edit** mode and click the **Page** tab so that you could enter content into the editable regions. The WYSIWYG editor toolbar should be visible.

### 4.2 Text formatting

Now let's take a look at how you can change formatting of your text content.

1. Highlight the part of your text you want to change (i.e. System integration).

System integration
We provide system integration services.

- 2. Now click on **Bold** sign in the WYSIWYG editor. The highlighted text should change.
- 3. Then highlight another part of the text and change its size by clicking the **Size** drop-down menu and click the **Medium**.

- 4. Now click the **Save** button at the top.
- 5. Switch to the Live site viewing mode. You should see your text with changed formatting.

That's how you change formatting of your text.

### 4.3 Inserting images

Very often, you will want to have some pictures on your website. Even for this task, you can use the WYSIWYG editor.

1. Choose the page to which you want to insert a picture. Switch in the editing mode and click the **Insert/Edit Image or media** icon in the WYSIWYG editor.

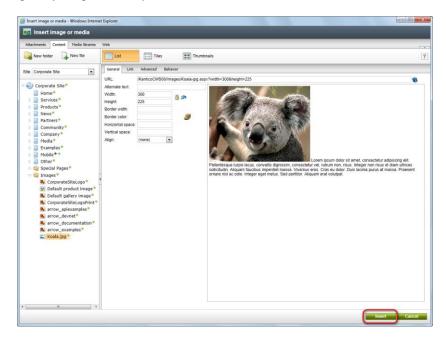

2. After clicking the icon, the following dialog will be displayed.

nsert image or media - Windows Internet		e sources	_		-	
New folder 🔒 New file	List	Tiles Thumb	ails 2. View mode			[

- 3. Choose **Content** tab, click the **Images** folder within the content tree. On the right side, you should see the images already uploaded on the server.
- 4. You can choose to use one of these or you can upload another picture from your computer. Click **New file** at the top to upload a new image on the server to the Content tree.

5. You will see a preview of the uploaded image. In the **Image properties** dialog, you can choose the width and height of the picture, its border, vertical and horizontal spacing and alignment. If you don't need to change anything for now, just click **Insert**.

You should see the picture being pasted in the text. Click Save. Click the Live site button to see the result of your efforts.

In a similar manner, you can upload flash movies to your website.

### 4.4 Creating links

Now you will learn how to add links to your web content.

1. In the **Page editing** mode, highlight the text you want to link to some part of your website.

2. Click the Insert/Edit Link button in the WYSIWYG editor toolbar.

19

3. A new Insert Link dialog opens. All you have to do now is to choose the target page and click **Insert**. Please note you can choose what target the link should point at. Possible choices are Attachments, Content, Media Libraries, Web, Anchor, E-mail.

Insert link - Windows Internet Explorer		- 0 <b>- X</b> -
📎 Insert link		
Attachments Content Media libraries	Web Anchor E-mail

Site: Corporate Site  Corporate Site*  Corporate Site*  Corporate Site*  Services*  System integration*  Web Design*	Geeral Target Advanced Protocot URL: (adher)   Karrifice/CMS60/Services/System-integration aspx	
Web Development  Network Administration  Products  News  News  Pathers  Community		
<ul> <li>▷ Company ●</li> <li>▷ Media ●</li> <li>▷ Examples ●</li> <li>▷ Mobile ● ●</li> <li>▷ Other ●</li> </ul>		
> 🍓 Special Pages® > 🍓 Images®		
< H	Insert	Cancel

4. Click **Save** on the document and switch to the **Live Site** mode. Click the newly created link. You should be redirected to the page chosen in the previous step.

### 4.5 Inserting a table

Now you will learn how to add a table to your website.

1. Click the Insert/edit table icon in the WYSIWYG editor.

2. In the **Table properties** dialog, change the number rows to 4 and the number of columns to 5. Then enter *My table* into the **Caption** field and click **OK**.

Table Properties	×
Table Properties Advanced	
Rows 3 Columns 2 Headers None	Width 500 Height
Border size	Cell spacing
Alignment <not set=""></not>	Cell padding
Caption My table Summary	
ОК	Cancel

Your table has been added to the web content.

# 5 Editing structured documents

Unlike pages with editable regions, structured documents have specific fields that you need to fill in. For example, the news have fields like News title, Release date, News summary and News text. These fields can be edited on the **Form** tab rather than on the **Page** tab.

### 5.1 Creating a news item

Now you will learn how to create a news item and add it to the news section.

**Please note:** Your news item must be added to the section that can show them. In the sample **Corporate Site**, it is the **News** page but it may be some other page on your site. Please contact your administrator.

1. In the content tree, click the **News** page and click the **New** button in the document action toolbar.

2. Choose the **News** document type.

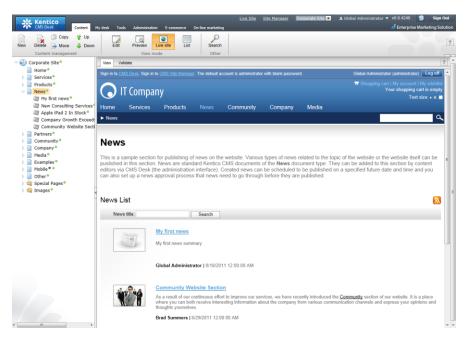

3. Now enter the title of your news: *My first news*. Then click the **Now** button to fill in the **Release date** value. In the **News summary** enter: *My first news summary*. In the **News text** enter: *My first news text* and skip the remaining fields.

🗄 Source 🛛 🧧	k 🖻 🛍 🕷 🛍 🤻 🛠 +   ← → 👭 4	2	BI	Ū,	abe X <sub>2</sub>	X2	1=	4 <u>8</u> 99	sing	<b>E</b> 2	≝ ≣

Release Date:	8/18/2011											
	My first news summary											
News Summary:												
News Summary.												
	My first news text											
News Text:												

4. Now click Save and create another.

- 5. Enter the title of your news: *My second news*. Then click the **Now** button to fill in the **Release date** value. In the **News summary** enter: *My second news summary*. In the **News text** enter: *My second news text* and skip the remaining fields. Click **Save**.
- 6. Now click on the **News** page in the content tree and switch to the **Live Site** mode. You can see your two news items added to the news page.

Congratulations, you have just learned how to add a news item.

23

# 5.2 Editing a news item

Now you will learn how to edit the content of the news item you have just created.

- 1. Click My First news in the content tree and choose the Form tab.
- 2. Change the **News Summary** text to *My first news updated summary*. Then change the **News Text** to *My first news updated text* and click **Save**.

Page Design	Form Properties

	My first news updated summary
	,
News Summary:	
	My first news text

3. Switch to the Live site to see your updated news.

# 6 Deleting, moving and sorting documents

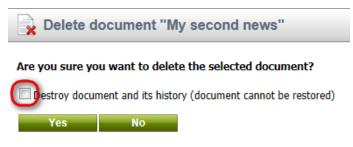

### 6.1 Deleting and restoring a document

Now you will learn how to delete a document and how to restore it later on.

1. Click the **My second news** item in the content tree. Click the **Delete** button in the document action toolbar.

2. Make sure that the **Destroy document and its history** checkbox is NOT checked and click **Yes**. (You may not see the Destroy document option if you do not have sufficient permissions.)

5. Find the one you have just deleted and click **Restore**.

6. Now you can switch back to the **Content** tab and you will see the restored **My second news** added back to the default location.

Congratulations, you've just learned how to delete and restore a document.

### 6.2 Changing document order

Now you will learn how to change the order of a document in the content tree.

1. Click the page you want to relocate (e.g. the Services page in the Corporate Site) in the content tree and click the **Down** button in the document action toolbar. You'll see that your page has been moved.

2. Now switch to the **Live site** view mode and you will see that your page has been moved in the main menu as well.

### 6.3 Moving documents to another section

Now, it's important to realize that the **Up** and **Down** buttons in the document action toolbar can be used only to move documents in a one level of the content tree. To move documents to any location in the structure of website you can use the **Move** button.

1. Click the page you want to move in the content tree (e.g. the Services page). Then click the **Move** button in the document action toolbar.

2. In the Move document dialog, click on the document where you want to move your page (e.g. the Company section) and then click **Move** button at the bottom.

You have just learned how to copy a document.

## 7 Translating documents

You might want to have your website in multiple languages so that your website would be useful for many visitors with different cultural backgrounds.

**Please note:** For this part of the guide, your website has to be configured for multiple language versions. You should see the language option drop-down menu or the flag selector in the language toolbar (when there are more than 5 cultures, you'll see rather drop-down list). If you cannot see it, please contact your administrator to configure multilingual support for you.

- 1. Make sure you are in the editing mode and choose from the **Language** drop-down menu (flag selector) the language to which you want to translate your documents.
- 2. In the content tree, click one of documents with a little cross next to it. The cross icon indicates the document hasn't been translated yet.

3. You will be displayed with dialog for creating a translated version of the document. In the following option, choose the **Copy content from another language** option and select from which language version you want your document to be copied. Then click the **Create document** button.

10.0	New culture version (fr-FR)
T	e document does not exist in the current culture. You can create a new culture version of the document.
Ć	Create empty document Copy content from another language Copy content from another language Copy content States
0	Create document

4. In the **Document name** field enter the translated title of your page. Click **Save.** 

Save)	Spell check		
Document name	Nouvelles		
Teaser image:	Upload file		
Menu group:	(none)		•
Publish from:		🔊 <u>Now</u>	
Publish to:		Now Now	

5. Now you can switch to the **Page** editing mode and start translating the content of your page. Please note, you will need to translate the master page (Root document) the same way to see whole content of the page.

Congratulations, you have just learned how to translate a document to another language.

## 8 Workflow and versioning

**Please note:** for the Workflow tutorial, we assume that your website has been configured for workflow. For more information please contact your administrator or consult the Kentico CMS Developer's guide.

#### 8.1 Publishing a document

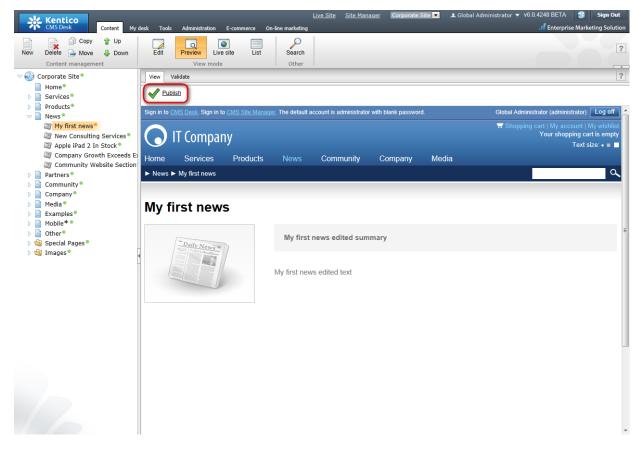

**Please note:** for this part of the user's guide, we use an example with three default workflow steps – edit, publish, archive. Your website might use different workflow steps. However, the procedure will be the same.

1. In the content tree on the left side, choose the document you want to edit. At the top of the editing/viewing space, there is a bar indicating your current **Workflow step: Edit**.

2. Edit the content of your page and click **Save**.

- 3. Now switch to the **Preview** viewing mode. You can see your page updated. However, you won't see your changes in the **Live site** viewing mode so far because your updated page has not been published yet and it's still in the **Edit** workflow step.
- 4. Click the **Publish** icon.

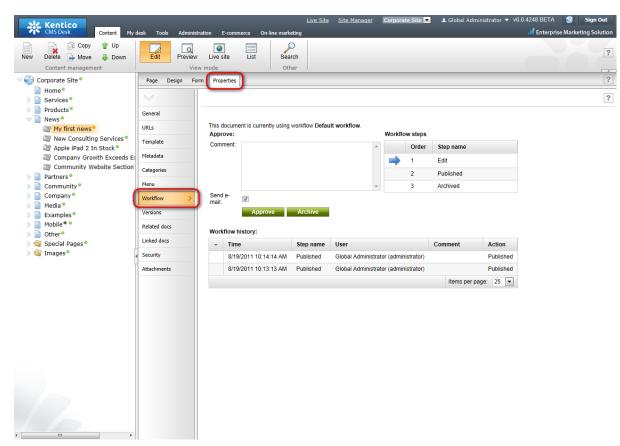

5. Now switch to the **Live site**. Your edited page has been published and is now visible on your real website.

That's how you get your document through the workflow steps to be published.

### 8.2 Archiving a document

You can use the Kentico CMS to archive a document from your website. It won't be visible to visitors but it will be stored in a database ready to be posted again any time you need.

1. In the content tree, click on the document you want to archive and choose the **Edit** viewing mode. Click the **Properties** tab.

2. In the vertical menu on the left, switch to the Workflow tab.

3. Now click the **Archive** button.

This docume Approve:	ent is currently using workflow Default workflow.	
Comment:		*
		Ŧ
Send e- mail:	Reject Archive	

That's how your document is withdrawn from the website and stored in the archive.

### 8.3 Versioning and rollback

Please note: Versioning and rollback work only for documents that use workflow.

You may want to list through previous versions of your document and choose one of the older versions to be published on the website. For that you can use Kentico CMS versioning and rollback.

?

?

?

It

- 1. In the content tree, click on the document you want to change. Make sure you are in the Edit viewing mode and go to the **Properties** -> Versions.

- 2. On the right side, you can see the list of versions of the document.

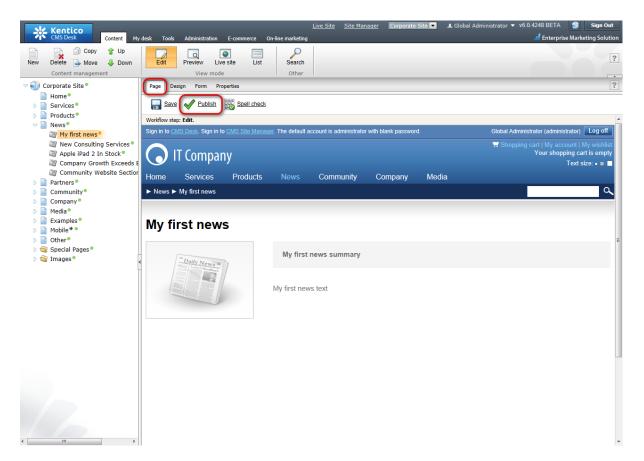

3. Choose the version you want to publish and click the Rollback version button.

- 4. Click **OK** to return to the selected version of the document.
- 5. Now switch to the Workflow tab in the vertical menu. You will see that the restored version of the document is in the workflow step Edit. You need to publish it again to be visible on the live site.

Workflow steps				
	Order	Step name		
	1	Edit		
	2	Published		
	3	Archived		

6. Switch to the **Page** editing mode and click **Publish**.

7. Now switch to the Live site viewing mode.

Congratulations, you have successfully rolled back to the older version of your document and you have published it on your website.

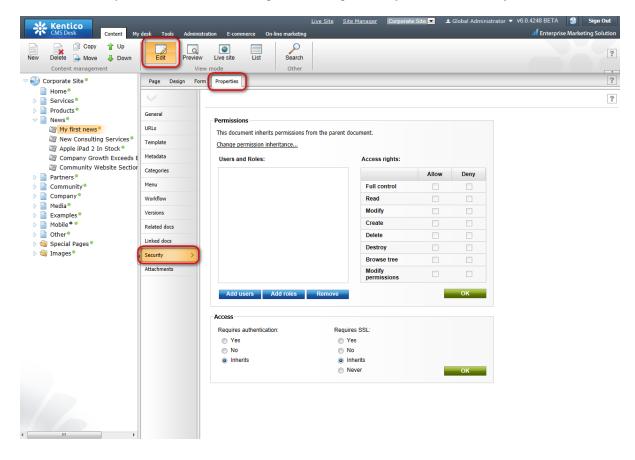

### 9 Security

#### 9.1 Granting permission to edit a document

**Please note:** For this part of the tutorial, you have to be a user with the access rights for granting permissions to other users.

For more information about security in Kentico CMS please consult the Developer's Guide.

- 1. In the content tree, choose the document to change its security settings.
- 2. Make sure you are in the Edit viewing mode and go to Properties -> Security.

3. Click Add roles button.

ermissions			
This document inherits permissions fro	om the parent document.		
Change permission inheritance			
Users and Roles:	Access rights:		
		Allow	Deny
	Full control		
	Read		
	Modify		
	Create		
	Delete		
	Destroy		
	Browse tree		
	Modify permissions		
Add users Add roles	Remove		ОК

4. In the Select roles dialog choose CMS Editor. Then, click OK.

Select	Select roles Webpage Dialog

Congratulations, you've just granted editing rights to the **CMS editors** role for the given document. Please note that you can also set permissions just for particular users this way.

### **10 Newsletters**

You might want to send your customers e-mail newsletters to inform them about your new products. In Kentico CMS, you can create your e-mail newsletters in a manner of minutes.

#### **10.1 Creating a newsletter issue**

1. At the main menu, switch to the **Tools** tab, choose **Newsletters** in the ribbon menu, switch to **Newsletters** tab and click **Edit** next to the existing newsletter (e.g. Corporate Newsletter).

Smartphone	
Software	

- 3. In the **Form** tab, enter:
  - Name: HTC Evo 3D
  - **Operating system:** Android 2.3 Gingerbread
  - Dimensions: 127 x 66 x 11.3 mm
  - Weight: 170 g
  - Display type: Super-LCD
  - Display size: 4.3"
  - **Display resolution:** 960x540
  - CPU: Qualcomm Snapdragon Dual-Core 1.2 GHz
  - RAM: 1 GB
  - Internal storage: 4 GB
  - **Removable storage:** 8 GB Micro-SDHC (expandable up to 32 GB)
  - Battery type: Li-ion 1730 mAh
  - Camera: Dual 5 MP
  - GPS: YES

Then check the **Create a new product** check box and enter *900* as **Price**. You can upload **Product image** if you want to. Choose *Smartphones* within the **Department** drop-down list. Click **Save** at the top. Your new product has been created.

# **13 File import**

#### 13.1 Bulk import of files

Now you will learn how to import files and documents to your website.

1. Go to **Tools** -> **File import**.

	*	Kentico CMS Desk G	ontent My desk	Tools Ad	ministration	E-commerce On-line	Liv marketing	<u>ve Site</u>	<u>Site Manager</u>	Corporate Site 💌	L Global Administrator ▼ v6.0.4248 BE		Sign Out

6. You are redirected to the **Home** page of the **Corporate site**. Click **Community** -> **Forums** at the main menu.

7. In the Site forums section, click My new forum.

#### Forums

This section represents sample discussion forums created using the **Forums** module. You can set up any number of forum groups and each forum group may contain multiple forums on particular topics. The forums are organized into threads. You can also use the **Forums** module for article comments if you use so called "ad-hoc" forums that are bound to a particular document (article, product, etc.). For more information on the **Forums** module, please refer to <u>Kentico CMS Developer's Guide -> Modules -> Forums</u>.

				Search forums: Go Advanced search

#### **15.2 Moderating forum posts**

Now you will learn how to create a moderate forum so that every post has to be approved before being published.

- 1. Go to **Tools** -> **Forums**.
- 2. Click Edit next to the existing forum group.
- 3. Now click the **Add forum** button.

4. Into the **Forum display name**, enter *My moderated forum*. Into the **Forum code name**, enter *MyModeratedForum*. Check the **Forum is moderated** checkbox. Then click **OK**.

Borum group properties
